

ANNOUNCING TYPHOON H

Yuneec's newest member to the Typhoon family delivers professional features at a prosumer price

Yuneec International, the world leader in electric aviation, today announced the expansion of its Typhoon series with the unveiling of the Typhoon H, a new category of drone for the enthusiast. Driven by customer demand for a more sophisticated drone, the Typhoon H delivers capabilities previously only found in high-end professional drones at a consumer price. The Typhoon H is equipped with six rotors, a 360-degree gimbal camera and retractable landing gear at an unprecedented price of \$1,799 with Yuneec's standard of being ready, easy and safe to fly.

The 360-degree gimbal with the new CGO3+ camera allows unlimited panning for breathtaking 4K videos and 12 megapixel stills. In addition, the landing gear retracts during flight to seamlessly remove itself from the shot for unobstructed views. The Typhoon H adds new flight and image capture modes including Dynamic Point of Interest, Orbit, Curved Cable and Journey. Innovative new safety features include ultrasonic proximity detection to assist in avoiding large

obstacles, and a failsafe system which allows Typhoon H to remain stable and land if a motor should fail.

An additional benefit is the compact and user friendly design of the Typhoon H. Quick disconnect props allow speedy removal from the motors, and each rotor arm easily folds down from its flight position to a resting position against the drone for easy and compact transportation using a custom-designed hardcase/backpack. Carbon fiber is used extensively to decrease weight while increasing durability.

The Typhoon H comes with the professional quality Android-based ST16 controller, which has a large 7-inch integrated display and HD 720p video downlink for stunning real-time video reception.

The Typhoon H also maintains the Typhoon family's focus on safety with features such as Geo-fencing, Variable Speed Control, Dynamic Return Home, Low-Battery Return Home and FAA No Fly. The Typhoon H will be available for the suggested retail price of \$1,799 USD.
